About my career journey

Hi, I'm a front-end developer with about 6 years of experience, specializing in JavaScript, TypeScript, and ReactJS. My journey in the tech industry has allowed me to work on several impactful company projects, where I've not only honed my front-end skills but also gained valuable insights into backend development with Java. While front-end development is my primary focus, I bring a well-rounded approach to my work, ensuring that my projects are robust and integrated seamlessly with backend systems.
